

# Alternative ways to treat back issues

Dr. Arnie Glatter D.C., of the Spinal Decompression Centre, has been practicing in Brampton for the past 31 years.

During this time, he has treated thousands of patients and has been successful in evaluating and managing patients with low back and neck pains, headaches and neurological conditions.

Dr. Glatter specializes in treating patients with herniated and bulging discs. This clinic is the only location in Brampton that offers the DRX 9000 "Non-Surgical", "Non-Invasive" Spinal Decompression Therapy.

nerve, repositioning and re-hydrating the disc, allow water, oxygen and other nutrients to be re-absorbed.

Research has shown that pain medications, anti-inflammatory drugs, injections and pain management, mask the symptoms temporarily, while the actual condition of the spine continues to deteriorate. Therefore, his treatment approach is geared to correcting the underlying problem of the pinched nerve and not only to relieve the symptoms.

The Centre has incorporated the most advanced technologies and treatment protocols

Spinal Decompression, utilizing the DRX 9000 is revolutionizing the treatment of debilitating low back pain. This "Non-Surgical", "Non-Invasive" drug free procedure has a high success rate for chronic low back pain, sciatica, herniated and/or bulging discs and degenerated disc disease.

The DRX 9000 Spinal Decompression is a hi-tech, computer controlled decompression system, that specifically targets individual discs and relieves pressure on the pain producing

to help patients address the root cause of their problem and rejuvenate the long-term health and function of their spine.

The Centre is conveniently located in the Heart Lake Medical Centre, 10425 Kennedy Rd. N. Brampton, which is located between Bovaird Road and Sandalwood Parkway. Call today for your free consultation at 905-840-1330.
